

MARKET ACCESS / HEOR MANAGER

The company

HealThink is a dynamic research and consulting company with international experience in health technology assessment. We have developed successful health economic models, value dossiers and innovative market access strategies for pharmaceutical and other companies, and coordinated research projects for public and private organizations. Evolving in the fast-changing environment, understanding the needs of our clients and offering high quality customized services are the cornerstones of our strategy.

The opportunity

Aligned with this strategy, we have decided to expand our capacity, and we are looking for experienced and self-motivated candidates seeking to advance their career and join our team. As part of our team, you will participate or manage HTA projects, the generation of evidence, the development of health economic models, and value dossiers' preparation. You will also support our clients to get products to market faster by developing and implementing strategies covering the requirements of all stakeholders.

Main Duties and Responsibilities

- Manage, conduct and communicate health economic & outcomes research (HEOR) projects in different therapeutic areas ensuring high-quality, on-time and on-budget delivery
- Develop market access strategies to achieve optimal funding conditions of new products and to ensure patient access to current and pipeline products of our clients
- Support, adapt or develop pharmacoeconomic models
- Prepare value dossiers and market access submissions
- Monitor relevant health policy developments
- Coach and mentor junior analysts promoting scientific excellence and quality
- Support team training in HEOR and Market Access

Required Skills & Experience

- Work experience in the Pharmaceutical or Medical Devices Industry

- Good working knowledge of market access, reimbursement pathways, regulatory requirements or pharmaceutical product management
- Bachelor's degree or higher in economics, health economics, health management or related discipline
- Excellent verbal and written communication skills in English (and Greek)
- Strategic thinking, problem-solving and decision-making skills
- Confidentiality and consistency
- Teamwork skills

Desired Skills & Experience

- Project management skills and experience
- Experience or knowledge in pharmacoeconomic modeling
- Experience with research methods, tools and approaches, such as reference management, abstract/manuscript submission
- Ability to coach and mentor team members
- Ability to work both independently and in a team environment
- Publications

Rewards

- Competitive salary + bonus
- Professional development
- Friendly working environment
- Work/life balance
